ACE Center: Eye-tracking studies of social engagement \$293, ACE Center: The development of the siblings of children with autism: A say, longitudinal study Analyses of brain structure and connectivity in young children with autism \$249, A novel quantitative framework to study lack of social interactions in autism A prospective multi-system evaluation of infants at risk for autism A prospective multi-system evaluation of infants at risk for autism A prospective multi-system evaluation of infants at risk for autism Autism: Social and communication predictors in siblings Autism spectrum disorder in Down syndrome: A model of repetitive and stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism \$51,3	93,269 09,408 49,000 38,922	University of Washington Yale University University of California, Los Angeles University of California, Davis Rutgers, The State University of New Jersey - New Brunswick Massachusetts General Hospital Massachusetts General Hospital Kennedy Krieger Institute Kennedy Krieger Institute		
ACE Center: The development of the siblings of children with autism: A longitudinal study Analyses of brain structure and connectivity in young children with autism \$249, A novel quantitative framework to study lack of social interactions in autism A prospective multi-system evaluation of infants at risk for autism A prospective multi-system evaluation of infants at risk for autism A prospective multi-system evaluation of infants at risk for autism Autism: Social and communication predictors in siblings Autism spectrum disorder in Down syndrome: A model of repetitive and stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism \$51,3 Clinical and behavioral phenotyping of autism and related disorders Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	09,408 49,000 38,922	University of California, Los Angeles University of California, Davis Rutgers, The State University of New Jersey - New Brunswick Massachusetts General Hospital Massachusetts General Hospital Kennedy Krieger Institute		
Analyses of brain structure and connectivity in young children with autism \$249, A novel quantitative framework to study lack of social interactions in autism \$0 A prospective multi-system evaluation of infants at risk for autism \$0 A prospective multi-system evaluation of infants at risk for autism \$0 A prospective multi-system evaluation of infants at risk for autism \$0 Autism: Social and communication predictors in siblings \$738, Autism spectrum disorder in Down syndrome: A model of repetitive and stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism \$51,3 Clinical and behavioral phenotyping of autism and related disorders \$2,11 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	49,000 38,922	University of California, Davis Rutgers, The State University of New Jersey - New Brunswick Massachusetts General Hospital Massachusetts General Hospital Kennedy Krieger Institute		
A novel quantitative framework to study lack of social interactions in autism \$0 A prospective multi-system evaluation of infants at risk for autism \$0 A prospective multi-system evaluation of infants at risk for autism \$0 Autism: Social and communication predictors in siblings \$738, Autism spectrum disorder in Down syndrome: A model of repetitive and stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism \$51,3 Clinical and behavioral phenotyping of autism and related disorders \$2,11 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior \$0 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	38,922	Rutgers, The State University of New Jersey - New Brunswick Massachusetts General Hospital Massachusetts General Hospital Kennedy Krieger Institute		
A prospective multi-system evaluation of infants at risk for autism A prospective multi-system evaluation of infants at risk for autism A prospective multi-system evaluation of infants at risk for autism Autism: Social and communication predictors in siblings Autism spectrum disorder in Down syndrome: A model of repetitive and stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism S51,3 Clinical and behavioral phenotyping of autism and related disorders Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	38,922	Massachusetts General Hospital Massachusetts General Hospital Kennedy Krieger Institute		
A prospective multi-system evaluation of infants at risk for autism A prospective multi-system evaluation of infants at risk for autism Autism: Social and communication predictors in siblings Autism spectrum disorder in Down syndrome: A model of repetitive and stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism \$51,3 Clinical and behavioral phenotyping of autism and related disorders \$2,11 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	38,922	Massachusetts General Hospital Kennedy Krieger Institute		
Autism: Social and communication predictors in siblings \$738, Autism spectrum disorder in Down syndrome: A model of repetitive and stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism Clinical and behavioral phenotyping of autism and related disorders \$2,11 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior \$0 \$0 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	38,922	Kennedy Krieger Institute		
Autism spectrum disorder in Down syndrome: A model of repetitive and stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism \$51,3 Clinical and behavioral phenotyping of autism and related disorders \$2,11 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior		, ,		
stereotypic behavior for idiopathic ASD CDI-Type I: Understanding regulation of visual attention in autism through computational and robotic modeling Cellular structure of the amygdala in autism S51,3 Clinical and behavioral phenotyping of autism and related disorders \$2,11 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior		Kennedy Krieger Institute		
Cellular structure of the amygdala in autism Cellular structure of the amygdala in autism Solution and behavioral phenotyping of autism and related disorders Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Solution and visualization of social and communicative behavior				
Clinical and behavioral phenotyping of autism and related disorders \$2,11 Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior		Yale University		
Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	1,326	University of California, Davis		
analysis, and visualization of social and communicative behavior Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	,117,811	National Institutes of Health		
analysis, and visualization of social and communicative behavior		University of Illinois at Urbana Champaign		
Collaborative research: Computational behavioral science: Modeling		University of Southern California		
analysis, and visualization of social and communicative behavior		Trustees of Boston University		
Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior		Massachusetts Institute of Technology		
Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	4,000	Georgia Tech Research Corporation		
Collaborative research: Computational behavioral science: Modeling, analysis, and visualization of social and communicative behavior	6,000	Carnegie Mellon University		
Components of limited activity monitoring in toddlers with ASD \$82,7	2,750	Yale University		
Development of face processing in infants with autism spectrum disorders \$409,	09,613	Yale University		
Electrophysiological correlates of cognitive control in autism \$129,	29,098	University of California, Davis		
Electrophysiological signatures of language impairment in autism spectrum \$344, disorder	44,521	University of Pennsylvania/Children's Hospital of Philadelphia		
Extraction of functional subnetworks in autism using multimodal MRI \$353,	53,349	Yale University		
Family studies of sensorimotor and neurocognitive heterogeneity in autism spectrum disorders (ASD) \$0		University of Texas Southwestern Medical Center		
Functional brain networks in autism and attention deficit hyperactivity disorder \$149,	49,841	Oregon Health & Science University		
HCC: Medium: Automatic detection of atypical patterns in cross-modal affect \$0		Oregon Health & Science University		
Identifying neurobiological markers of the broader autism phenotype \$106,	06,245	University of Melbourne		
Imitation in autism \$0		King's College London		

Project Title	Funding	Institution	
Magnetic source imaging and sensory behavioral characterization in autism	\$176,229	University of California, San Francisco	
Mutliple social tasks and social adjustment	\$143,550	California State University, Northridge	
Neural mechanisms underlying obsessive compulsiveness in ASD	\$31,987	University of Michigan	
Neural predictors of language acquisition after intensive behavioral intervention	\$181,207	University of California, Los Angeles	
Neuroimaging & symptom domains in autism	\$10,135	University of California, Los Angeles	
Perception of social and physical contingencies in infants with ASD	\$319,523	Emory University	
Predicting useful speech in children with autism	\$607,697	Vanderbilt University	
Predicting useful speech in children with autism (supplement)	\$195,164	Vanderbilt University	
Restricted repetitive behavior in autism	\$377,158	University of North Carolina at Chapel Hill	
Social-emotional development of infants at risk for autism spectrum	\$598,969	University of Washington	
Social evaluation in infants and toddlers	\$409,613	Yale University	
The intersection of autism and ADHD	\$161,293	Washington University in St. Louis	
Translational developmental neuroscience of autism	\$164,718	New York University School of Medicine	
Using a direct observation assessment battery to assess outcome of early intensive behavioral intervention for children with autism	\$10,000	New England Center for Children, Inc.
